Claim Rejections - 35 USC § 103

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 15, 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor et al. (5,975,090) in view of Aoki Kazuhisa (JP6154027) in view of Ikemoto (5,150,491).

With respect to claim 15, it is noted that Taylor et al discloses all the limitations, except for a bristles around the opening in the brush base are removed to provide a plan surface area where no bristle exists; as claimed by applicant. However, in a similar art, Aoki Kazuhisa evidences the use of a brush with bristles removed from around the opening of the brush base providing a plain surface area where no bristle exists so that the brush is softer to the hair and also has a repair effect to damage hair.

Therefore, given the teaching Aoki Kazuhisa, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the brush of Taylor et al., as taught by Aoki Kazuhisa, to provide a brush that is softer to the hair and also has a repair effect to damage hair.

It is also noted that the above combination of references did not teach of a brush base made of an antistatic material, as claimed by applicant. However, in a similar art

Art Unit: 3732

Ikemoto evidences the use of a brush base made of antistatic material to prevent charging of the bristles and hair.

Therefore, given the teaching of Ikemoto, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the brush base of the device Taylor/Aoki, as taught by Ikemoto to prevent charging of the bristles and the hair.

With respect to claim20, Taylor discloses an indicator, as set forth column 4, line 1; as to the location of the indicator, it has been held that rearranging parts of an invention involves only routine skill in the art. In re Japikse, 86 USPQ 70.

Allowable Subject Matter

Claims 10-14, 16-18,21, are allowed.

Response to Amendment

Applicant's arguments with respect to claims 15,20 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Application/Control Number: 09/989,143

Art Unit: 3732

shortened statutory period will expire on the date the advisory action is mailed, and any

Page 4

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Pedro Philogene whose telephone number is (703) 308-

2252. The examiner can normally be reached on Monday to Friday 6:30 AM to 4:00

PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Kevin P Shaver can be reached on (703) 308-2582. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
